

Android build reference.

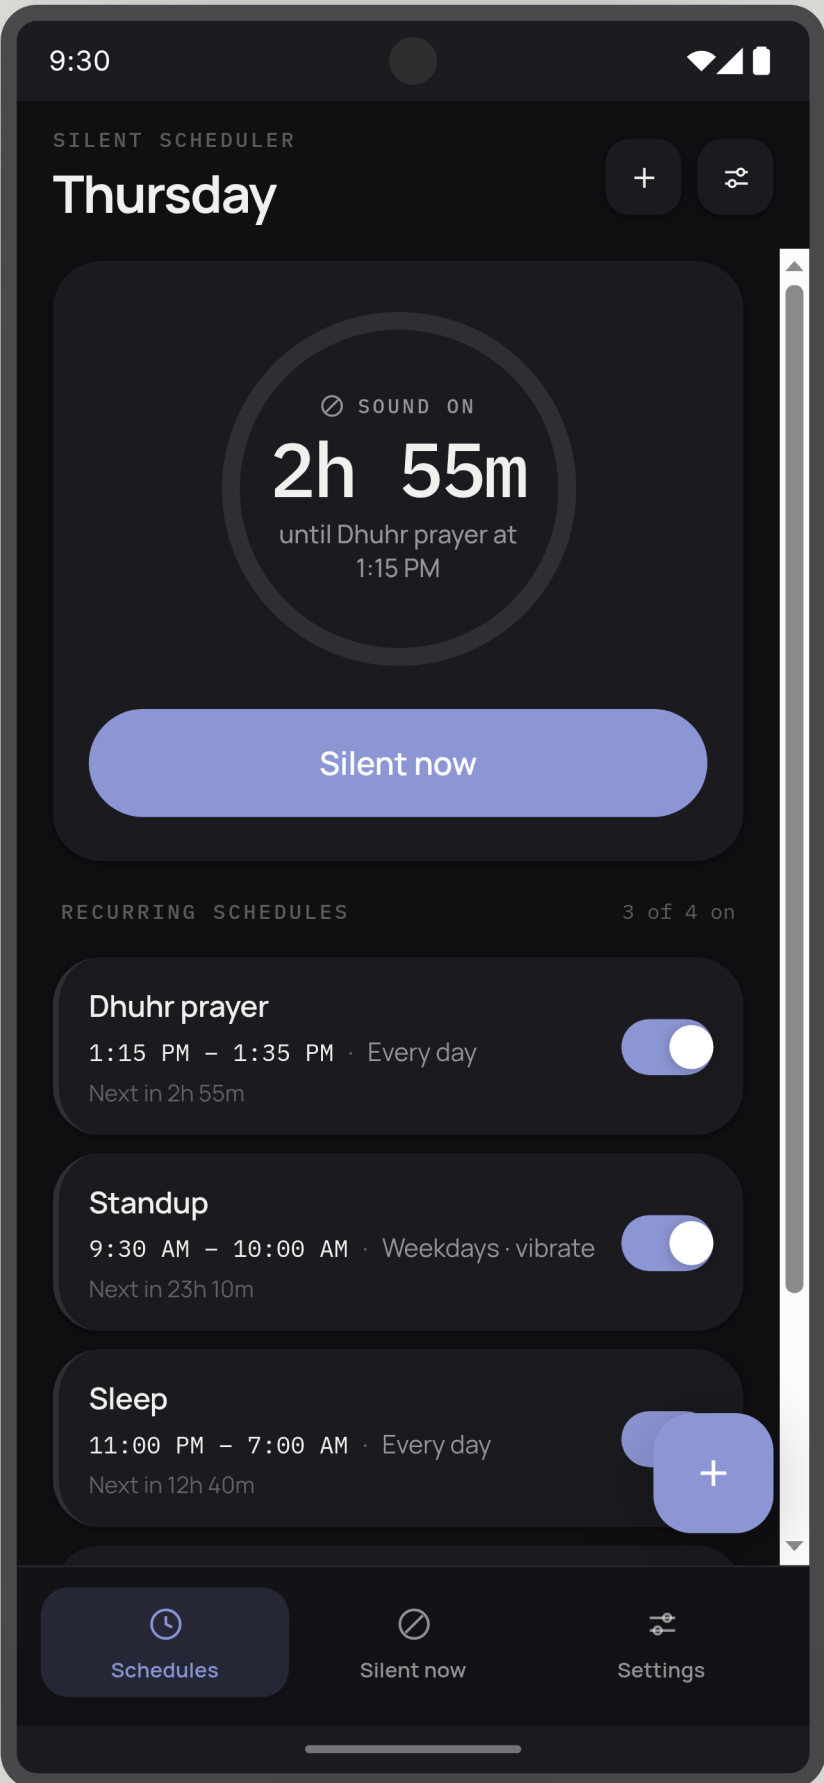

Material 3 chrome throughout: pill buttons, 24px cards, outlined-track switches, a 60px FAB for new windows, and a nav bar whose active item carries an accentSoft pill. Mono numerals (IBM Plex Mono) and calm 220ms motion are locked. Light and dark are the same layout with swapped tokens; the theme follows the OS by default, with a manual override in Settings.

A All screens – interactive

a1 Dashboard · light – tap Silent now, toggle windows, tap a row to edit

a2 Dashboard · dark

a3 Onboarding – Do Not Disturb access
